

April 2009

Multi-level awards plinth - better than a table and a white cloth....

Our own version of the awards plinth theme is now in commission and available to rent.

It's designed to be very flexible and adaptable and look good in any situation, even after all the awards have been presented and it's empty and bare. The widest level is 750mm from the floor, and steps up in units of 150mm.

The stages are loose so can be arranged in any combination, and stack inside the largest section for transporting - that's a major improvement on previous versions and means it can easily be carried in the back of a reasonable size car.

Horizontals are 150mm wide and made from opaque Perspex, they can be uplit from inside

the bottom section, using 4 x LED floor cans - also available from PresPro. These can be set to any colour or controlled by DMX, and - crucially - make no heat so can be left on, inside the box, for hours on end.

The box is made of wood and can be painted (standard colour is white), or branding attached as in the picture.

Price to you - £100 per day, uplighters £40 per day for 4.

Prices exclude delivery, repainting and VAT.
